THE STRUCTURAL ENGINEER

THE JOURNAL OF THE INSTITUTION OF STRUCTURAL ENGINEERS

INDEX VOL. 45. 1967

PAGE

Aerodynamics: Design of two unusual structures at York University 175
AKROYD, T. N. W.: Workmanship for a structural concrete code —Discussion 219
—Correspondence 408
ALCOCK, D. G.: Computer analysis of reinforced concrete members and foundations 303
Aluminium:
Durability in design 351
Lateral buckling of concrete beams lifted by cables (tests) —Correspondence 210
Two buildings with suspended structures (aluminium curtain wall) 143
—Discussion 317, 442
Anchor zone stresses due to tangential loads —Précis 152
Andrews-Kent Prize 45
Annual Dinner, 1967 .. .. .. 99, 141, 203
Annual General Meeting, 1967 .. .. 174, 233, 263
Arches:
Craigellachie bridge—reconstruction .. 23
—Discussion 287
Design of network arches —Correspondence 68
Large deflections of structures by stiffness method —Précis 169
Roof of East Kilbride swimming pool .. 435
Architecture:
Architecture as structure and environment 3, 38
Art of structural engineering —Discussion 29
Basements: Government offices, Horseferry Road, London 337
Beams:
Anchor zone stresses due to tangential loads Précis 152
Lateral buckling of concrete beams lifted by cables —Correspondence 210
Reinforced brickwork and concrete slabs forming box beams 379
Roof of East Kilbride swimming pool (concrete, prestressed) 435
Shear design and British Code CP114 .. 153
Superstructure of Tasman Bridge (curved beams) —Discussion 365
Thirty-one-storey flats in structural steelwork (composite) 111
—Discussion 403
Two buildings with suspended structures in high yield steel (castellated) 143
—Discussion 317, 442
Bending moments, etc.:
Bending of cantilever towers subjected to side loading 325
Inglis A: rigid multi-storey welded steel frame —Discussion 245

Bending moments, etc. (*cont.*): PAGE
Lateral buckling of concrete beams lifted by cables —Correspondence 210
Roof of East Kilbride swimming pool .. 435
BICKEL, J. O.: Trench type subaqueous tunnels —Discussion 131
Bolts, high strength:
Design and construction of Drapers Gardens Development 47
—Discussion 369
Design of two buildings with suspended structures 143
—Discussion 317, 442
Book reviews:
Achieving Balance between Capacity and Sales: British Productivity Council .. 136
Application of Fracture Toughness Parameters to Structural Metals: Materials Technical Committee of AIME 290
Basic Theory of Structures: J. S. C Browne 34
Beam and Frame Analysis: B. E. Jay .. 136
Beams on Elastic Foundations: K. C. Ray 434
British Building Industry: M. Bowley .. 324
Composite Materials: A. Kelly and Others 244
Computer Applications in Concrete Design and Technology: ACI Publication SP-16 350
Degree Problems in Fluids: W. R. Dickens 186
Dictionary of Building Materials: W. Kinniburgh 290
Elasticity—Tensor, Dyadic and Engineering Approaches: Pei Chi Chou and N. J. Pagano 433
Electrical Analogues in Structural Engineering: K. K. Keropyan and P. M. Chegolin 434
Electric Lifts. A Manual of Current Practice, 5th Ed.: R. S. Phillips 290
Elementary Mechanics of Solids: P. P. Benham 91
Engineering at Cambridge University 1783-1965: T. J. N. Hilken 364
Engineering Materials Science—Structure and Mechanical Behaviour of Solids: S. M. Edelglass 297
Engineering Mechanics: W. W. Hagerty and H. J. Plass, Jnr. 434
Engineering Mechanics: B. N. Thadani .. 244
Essentials of the Theory of Structures: Joiner J. H. 434
Festigkeitslehre: Wilhelm Flügge 350
Fluid Mechanics: D. A. Gilbrech 186
Groundwater Seepage Rates: N. A. Ogil'vi and D. I. Fedorovich 136
Guide to Design Criteria for Metal Compression Members, 2nd Ed.: B. G. Johnston, Editor 290

Book Reviews *(cont.)*: PAGE

Industrialized Building and the Structural Engineer. A Symposium organized by the Institution of Structural Engineers .. 433
Interdependence and Uncertainty. A Study of the Building Industry: C. Crichton, Editor 91
International Association for Bridge and Structural Engineering 7th Congress, Rio de Janeiro, 1964. Final Report 297
Konstruktionslehre des Stahlbetons, Vol. I, 2nd Ed.: G. Franz 324
Linear Framed Structures: M. S. Gregory .. 91
Matrices for Structural Analysis, 2nd Ed.: S. J. McMinn 290
Mechanical Behaviour of Materials: F. A. McClintock and A. S. Argon, Editors .. 91
Mechanics of Materials: A. C. D'Souza .. 350
Metallurgical Principles for Engineers: J. G. Tweeddale 350
Momenten-Einflusszahlen für Durchlaufträger mit beliebigen Stützweiten, 5th Ed.: H. Graudenz 324
Nondestructive Testing, 2nd Ed.: W. J. McGonnagle 244
Numerical and matrix methods in Structural Mechanics: P. C. Wang 34
Plastic Design: N. Burnett and Others .. 186
Practical Mechanical Design: J. G. Tweeddale 290
Principles of Surveying, 3rd Ed.: J. Clendinning and J. G. Olliver 350
Problems in Engineering Soils: P. L. Capper, W. F. Cassie and J. D. Geddes 34
Progress in Applied Materials Research, Vol. 7: E. G. Stanford, J. H. Fearon and W. J. McGonnagle, Editors 364
Refractory Metals and Alloys III. Applied Aspects—3rd Technical Conference, 1963: R. I. Jaffee, Editor 244
Safety of Structures: Sir Alfred Pugsley .. 244
Simplifications et améliorations a la méthode de Cross: P. Charon 34
SKF Civil Engineering and Materials Handling Equipment Bearing Data: SKEFKO Ball Bearing Co., Ltd. 136
Solution of Problems in Structures, 2nd Ed. (paper-back): W. T. Marshall 350
Some Problems in the Theory of Creep in Concrete Structures: N. Kh. Arutyunyan 186
Stabilité d'une coque en forme d'hyperboloide de révolution sous des charges uniformément réparties sur les bords et symétriques par rapport à son axe: J. Wianecki 91
Stability and Oscillations of Elastic Systems: Y. G. Panovko and I. I. Gubanova .. 290
Steel Designers' Manual, 3rd Ed.: British Steel Producers' Conference 136
Structural Adhesives Bonding. Papers presented at Symposium at Stevens Institute of Technology, 1965: M. J. Bodnar, Editor 364
Structural Analysis of Beams and Slabs: J. Hahn 297
Structural Analysis. The Solution of Statically Indeterminate Structures, 3rd Ed.: W. Fisher Cassie 136

Book Reviews *(cont.)*: PAGE

Students Structural Handbook: W. Morgan 364
Surveying, 2nd Ed. (paper-back): A. Bannister and S. Raymond 350
Symposium on Reinforced Concrete Columns: ACI Publications SP-13 297
Theory of Automatic Control: H. Takai .. 350
Theory of Beams, 2nd Ed.: T. Iwinski .. 364
Thermal Stresses in a Composite Cylinder: V. S. Nikishin 136
Thermodynamics for Engineers: M. A. Saad 186
Thin Walled Beams: M. Zbirohowski-Koscia 349
Torsion: C. F. Kollbrunner and K. Basler .. 324
Ultrasonic Machining of Intractable Materials: A. I. Markov 290
Ultrasound in the Production and Inspection of Concrete—Part I. Production Applications: Yu E. Kornilovich and V. I. Belokhvostikova. Part II. Inspection in Hydraulic Construction: A. K. Tretyakov and A. M. Filonidov 297
Universal Beam and Column Design Charts: J. Wright 434
Voiles minces réglés: Leonide Hahn .. 364
Bowen, C. F. P. and T. M. Charlton: A note on the approximate analysis of suspension bridges 241
Brickwork:
Free standing and panel walls —Précis 110
Testing of reinforced brickwork and concrete slabs forming box beams 379
Bridges:
Approximate analysis of suspension bridges 241
Computer analysis of bridges having varying section properties 395
Design of network arches —Correspondence 68
Evidence on collapse of Calder bridge .. 416
Fatigue strength of wrought iron after weathering 193
Large deflections of structures by stiffness method —Précis 169
Practical determination of buckling load of prismatic element —Correspondence 212
Reconstruction of Craigellachie bridge .. 23
—Discussion 287
Superstructure of the Tasman bridge, Hobart 81
—Discussion 365
Workmanship for a structural concrete code —Discussion 219
—Correspondence 408
Brown, G. S.: See Frischmann, W. W., G. S. Brown and S. S. Prabhu
Buckling:
Determination of buckling load for columns with varying section 205
Determination of buckling load of a prismatic element —Correspondence 212
Lateral buckling of concrete beams lifted by cables —Correspondence 210
Workmanship for a structural concrete code 219
—Correspondence 408
Building and buildings:
Architecture as structure and environment 3, 38
Art of structural engineering —Discussion 29
Design and construction of Drapers Gardens Development 47
—Discussion 369

Building and buildings *(cont.)*: PAGE
- Design and construction of precast concrete factory extension 69
- —Discussion 313
- Durability in design 351
- Government offices, Horseferry Road, London 337
- Industrialized Building and the Structural Engineer Proceedings 204, 234, 266, 312
- Joint Building Group 1965-66 Report 1, 35, 45
- Shear design and the British Code CP114 153
- Thirty-one-storey flats in structural steelwork 111
- —Discussion 403
- Timber engineering: research, design and industrialization and Code of Practice CP112 101
- —Discussion 291
- Two buildings with suspended structures in high yield steel 143
- —Discussion 317, 442

BULLEN, F. R.: Award of Certificate of Commendation 173

Cables:
- Anchor zone stresses due to tangential loads Précis 152
- Approximate analysis of suspension bridges 241
- Lateral buckling of concrete beams lifted by cables —Correspondence 210

Cantilever construction and method:
- Bending of cantilever towers subjected to side loading 325
- Design of two buildings with suspended structures 143
- —Discussion 317, 442
- Thirty-one-storey flats in structural steelwork 111
- —Discussion 403

Car parks (Underground): Government offices, Horseferry Road, London .. 337

Cement, high alumina: Structural use of precast concrete and CP116 (1965)
- —Discussion 159

CHANDRA, D. and P. K. Som: Anchor zone stresses due to tangential loads —Précis 152

CHARLTON, T. M.: See BOWEN, C. F. P. and T. M. Charlton

Chimneys, Concrete: Design of unusual structures at York University 175

Cladding:
- Durability in design 351
- Thirty-one-storey flats in structural steelwork 111
- —Discussion 403

Codes of Practice:
- Durability in design 351
- Shear design and British Code CP114 .. 153
- Structural use of precast concrete and CP116
- —Discussion 159
- Timber engineering and CP112 101
- —Discussion 291
- Workmanship for a structural concrete code
- —Discussion 219
- —Correspondence 408

Columns:
- Buckling load for columns with varying section 205
- Computer analysis of reinforced concrete members 303

Columns *(cont.)*: PAGE
- Design and construction of Drapers Gardens Development 47
- —Discussion 369
- Design and construction of precast concrete factory extension 69
- —Discussion 313
- Determination of buckling load of a prismatic element —Correspondence 212
- Government offices, Horseferry Road, London 337
- Inglis A: multi-storey welded steel frame
- —Discussion 245
- Lateral buckling of concrete beams lifted by cables —Correspondence 210
- Thirty-one-storey flats in structural steelwork 111
- —Discussion 403

Composite construction:
- Inglis A: multi-storey welded steel frame
- —Discussion 245
- Prestressed concrete-encased steel portal frames under load 267
- Structural use of precast concrete and CP116
- —Discussion 159
- Testing of reinforced brickwork and concrete slabs forming box beams 379
- Trench type subaqueous tunnels
- —Discussion 131
- Two buildings with suspended structures in high yield steel 143
- —Discussion 317, 442

Computation:
- Bending of cantilever towers subjected to side loading 325
- Computer analysis of bridges having varying section properties 395
- Computer analysis of RC members and foundations 303
- Elastic-plastic analysis and design of pitched roof frames 187
- Elastic-plastic analysis by computer for framed structures loaded to collapse
- —Correspondence 22, 33
- Foundation mat problems by finite element methods —Correspondence 215
- Presidential Address: Challenge of expanding populations 417
- Standardization of Input Information for Computer Programs in Structural Engineering—ISE publication 416
- Thirty-one-storey flats in structural steelwork 111
- —Discussion 403
- Use of Digital Computers in Structural Engineering—ISE Report 416

Concrete:
- Anchor zone stresses due to tangential loads
- —Précis 152
- Behaviour of prestressed, concrete-encased steel portal frames under load 267
- Computer analysis of reinforced concrete members and foundations 303
- Concrete practice, Part 2—Site supervision and testing: ISE Report 416
- Design and construction of Drapers Gardens development 47
- —Discussion 369

Concrete *(cont.)*: PAGE

Durability in design 351
Government offices, Horseferry Road, London 337
Lateral buckling of concrete beams lifted by cables —Correspondence 210
Long-term deformation characteristics of Lytag concrete 13
—Discussion 251
Precast concrete multi-storey factory extension 69
—Discussion 313
Roof of the East Kilbride swimming pool .. 435
Shear design and British Code CP114 .. 153
Structural use of precast concrete and CP116 —Discussion 159
Superstructure of the Tasman bridge .. 81
—Discussion 365
Testing of reinforced brickwork and concrete slabs forming box beams 379
Thirty-one-storey flats in structural steelwork 111
—Discussion 403
Trench type subaqueous tunnels
—Discussion 131
Two buildings with suspended structures in high yield steel (concrete core) 143
—Discussion 317, 442
Two unusual structures at York University 175
Workmanship for a structural concrete code
—Discussion 219
—Correspondence 408
Yield of a square reinforced concrete slab on simple supports, allowing for membrane forces 235
Construction industry: Presidential Address—challenge of expanding populations 417
Contracts: Joint Building Group 1965-66 .. 35
COOK, E. J.: Obituary notice 233
COPE, R. J. and F. Sawko: Correspondence on 'The solution of foundation mat problems,' by R. T. Severn 215
Corrosion:
Durability in design 351
Fatigue strength of wrought iron after weathering in service 193
Cost plan: Joint Building Group 1965-66 .. 35
COUZENS, M. L.: See PLOWMAN, J. M., R. J. M. Sutherland and M. L. Couzens
CREASY, L. R.: Award of Certificate of Commendation 173
CULLIMORE, M. S. G.: Fatigue strength of wrought iron after weathering in service 193
Debate: That structural design is best carried out in professional offices 11, 279
Deflection:
Approximate analysis of suspension bridges 241
Bending of cantilever towers subjected to side loading 325
Buckling load for columns with varying section 205
Elastic-plastic analysis by computer for framed structures loaded to collapse
—Correspondence 22, 33
Large deflections of structures by stiffness method —Précis 169
Reinforced brickwork and concrete slabs forming box beams 379

Deflection *(cont.)*: PAGE

Two buildings with suspended structures in high yield steel 143
—Discussion 317, 442
PATERSON, W. S.: See EVANS, R. H. and W. S. Paterson
Piles:
Design and construction of Drapers Gardens development 47
—Discussion 369
Thirty-one-storey flats in structural steelwork 111
—Discussion 403
Plastic theory and design:
Behaviour of prestressed, concrete-encased steel portal frames under load 267
Elastic-plastic analysis and design of pitched roof frames 187
Elastic-plastic analysis by computer for framed structures loaded up to collapse —Correspondence 22, 33
Inglis A: rigid multi-storey welded steel frame .. .. —Discussion 245

SCRUBY, Brian: President, 1967-68 301
Presidential Address, 1967—The challenge of expanding populations 417
Settlement, differential: Government offices, Horseferry, Road, London 337
SEVERN, K.: Education and training for the design office 425
SEVERN, R. T.: Solution of foundation mat problems, by finite element methods —Correspondence 215
Shear design and British Code CP114 .. 153
Shell analysis and construction:
Large deflections of structures by stiffness method —Précis 169
Roof of East Kilbride swimming pool .. 435
S.I. Units: Metric system change .. 266, 311
Site investigation:
Design and construction of Drapers Gardens development 47
—Discussion 369
Durability in design 351
Slabs:
Testing reinforced brickwork and concrete slabs forming box beams 379
Yield of a square RC slab on simple supports 235
SOM, P. K.: See CHANDRA, D. and P. K. Som
Stanchions: Tests on stability beyond elastic range —Précis 80
Steel:
Behaviour of prestressed concrete-encased steel portal frames 267
Design and construction of Drapers Gardens development 47
—Discussion 369
Design of network arches —Correspondence 68
Design of two buildings with suspended structures in high yield steel 143
—Discussion 317, 442
Design of two unusual structures at York University 175
Durability in design 351
Inglis A: rigid multi-storey welded steel frame —Discussion 245
Thirty-one-storey flats in structural steelwork 111
—Discussion 403
Trench type subaqueous tunnels —Discussion 131
Stiffness method: for large deflections of structures —Précis 169
Stresses:
Anchor zone stresses due to tangential loads —Précis 152
Determination of buckling load of a prismatic element —Correspondence 212
Fatigue strength of wrought iron after weathering 193
Roof of East Kilbride swimming pool .. 435
Structural analysis:
Approximate analysis of suspension bridges 241
Approximate procedure for determination of buckling load for columns with varying section 205
Bending of cantilever towers subjected to side loading 325

Structural analysis *(cont.)*: PAGE
Computer analysis of bridges having varying section properties 395
Computer analysis of RC members and foundations 303
Elastic-plastic analysis by computer for framed structures loaded up to collapse —Correspondence 22, 33
Large deflections of structures by stiffness method —Précis 169
Solution of foundation mat problems by finite element methods —Correspondence 215
Structural design is best carried out in professional offices—Debate 11, 279
